

Day 1 – Arts Integration Task

- Partition off a little of your graph paper for this project – the whole thing probably has a funky amount of squares
- Your project must be unique – it can't look the same as anyone else's!
- Your project must be filled in completely – no plain white
- You are welcome to cut the shapes into smaller pieces, but you have to use the shapes in these bowls
- The following colors must take up the following fractions of the page:

MINT $\frac{1}{8}$ PINK $\frac{1}{4}$ ORANGE $\frac{3}{8}$ LIME $\frac{1}{8}$ YELLOW $\frac{1}{8}$

Other instructions:

1. Make sure that you can still put this into your binder – don't disrupt the hole-punched part!
2. Put your name somewhere on the project
